LOCATION/HABITAT:

COLLECTOR:

COLLECTION DATE & TIME:

ETHNOBOTANICAL USES:

After the guided tour of the Nelson Mandela Garden in les Halles in Paris by Eva-Maria Lopez for The Traveling Plant event at ISEA 2023, participants were given a note card modelled after the traditional herbarium plate. They were asked to draw their own plant mentioning its scientific and its common name, its usual location/habitat, the name of the collector and, the date and time of its collection and its ethno-botanical uses if any. Full freedom was given of what could be chosen and drawn.

This booklet presents the 25 extraordinary drawings that we collected. They show a wide perspective from actual plants to fully imaginary ones. They span from full plants to portions of them —trunks, seeds, flowers, leaves, telling as many different stories as the number of people that engaged with incredible seriousness, commitment and creativity in this action.

Annick Bureau

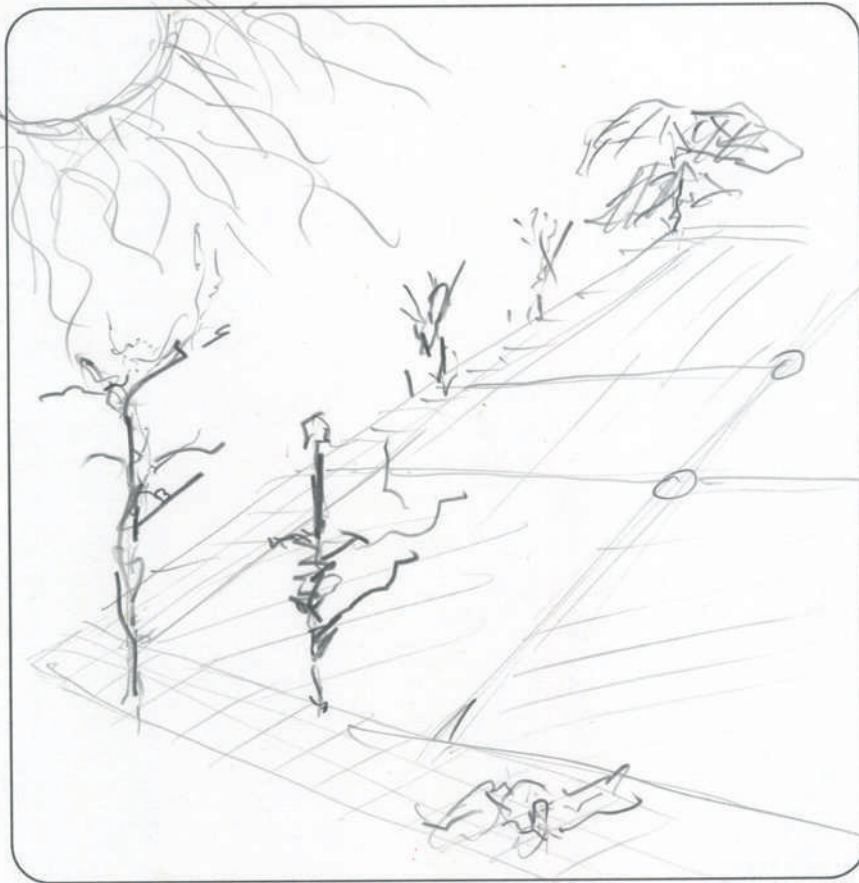

Curator of „The Peripatetic Tour of the Nelson Mandela Garden above ISEA 2023“ for The Traveling Plant.
